

TITLE OF THE TALK

A.U. THOR, S.E. CONDAUTHOR

Theorem 1. *The abstract should be either 1 or 2 pages using this template.*

Remark 1. Don't forget to spell-check your document!

Theorem 2. *All mathematical equations, even if they consist of a single character, have to be written using one of equation environments: `$...$`, `\[...\]`, `\begin{equation}...\end{equation}` etc.*

Remark 2. Label only referenced equations:

$$e^{i\pi} + 1 = 0,$$

thus

$$e^{2\pi i} = 1. \tag{1}$$

Example 1. Examples of references: theorem 2, equation (1), papers [1] and [2] ...

Some rules of good typesetting:

- (1) Define document's logical structure. Don't use constructions like

`\noindent\textbf{Theorem~1.}\enspace \textit{Text.}`

Instead use the `theorem` environment and similiar ones.

- (2) Don't use " as quotes. Use «French quotes» or “English quotes”.
- (3) Distinguish between dash -, en-dash –, em-dash —, and minus —.
- (4) ...Happy L^AT_EXing!
