

TITLE OF THE TALK

A.U. THOR, C.O. AUTHOR

This is an abstract template for the *XIX International Scientific Mykhailo Kravchuk Conference*. To submit your abstract please:

- (1) Rename this `.tex`-file according to the authors' last names (e.g. `Surname1,Surname2.tex`).
- (2) Prepare your abstract using this template. Make sure that L^AT_EX compiles without errors.
- (3) E-mail both `.tex` and `.pdf` files (and also all included images/etc. files, if any) to the organizing committee, indicating the section number and your last name in the subject of the letter.

Theorem 1. *The size of the abstract should be 1 or 2 (full) pages.*

For theorems, definitions, examples, etc., use the appropriate environments, e.g.: `\begin{theorem}... \end{theorem}`.

Don't use " as quotation marks. Use «French double quotation marks» or “British double quotation marks”.

All mathematical equations (even those consisting of just one character), should be typed in one of the equation environments, e.g.: $a^2 + b^2 = c^2$ or

$$a^2 + b^2 = c^2.$$

Number only those equations that are referenced, like this:

$$\int_a^b f(x) dx = F(b) - F(a) \tag{1}$$

To insert a reference use `\ref` or `\eqref` commands, e.g.: theorem 1, equation (1). To insert a citation use the `\cite` command, e.g.: paper [1], book [2].
